

Lapel Pins from Wood

We craft custom wooden pins in nearly any shape and size you can imagine! Whether you're looking for classic round or rectangular pins or something uniquely contour-cut to match an irregular shape, we've got you covered. Our wooden pins are made with a sturdy thickness of about 1/16" to 1/8". The pin attachment is carefully placed at the center or close to the top for perfect balance.

Please note the specific requirements for wooden products: The design must be 0.2" smaller than the outside dimensions of the pin. There must be a 0.1" margin on every side of the design in plain wood.
